M@MM

FESTIVAL
OF
GAMES NLGD

The explosive growth of audiovisual culture in the last thirty years has meant an enormous development for the multimedia music genre. Music can't be missed while watching television, or visiting theatres, movies, even museums, and of course, while playing videogames. How does the world of multimedia music work? How is it implemented and by whom? And what does adaptivity in music for games mean? Featuring interesting lectures, discussions and musical demonstrations Music@Games will reveal the connection between the music and games industry.

Program

- 12.30 - 13.00** **Doors open**
13.00 - 13.05 **Opening by Loek Dikker (Chairman MiMM)**
13.05 - 13.30 Introductory reading by Jan IJzermans (Chairman board of Faculty Art, Media & Technology, associate Professor Music Design, Utrecht School of the Arts)
